13. Type of Report & Period Covered
Status report through
June 1982

14.

15. Supplementary Notes
Supercedes EPA Chemical Activities Status Report, second edition

16. Abstract (Limit: 200 words)

Volume I provides names and synonyms for chemicals included in the data base, both alphabetically and by registry number.

Volume II gives brief descriptions of chemical-specific regulations, guidelines, and studies of EPA.

Together, the reports permit users to identify chemicals of interest to EPA, and describe EPA activities related to those chemicals.

Chemical Activities Status Report

Third Edition

Volume II

Compiled under the direction of:
Eleanor T. Merrick
With the assistance of:
Patricia Grim

Data in this publication are current as of May 1982

Foreword

The EPA Chemical Activity Status Report (EPACASR) is a guide to Agency activities relating to chemical substances. It is easily accessed by chemical *via* Chemical Abstract Services [CAS] Registry Number. The activities listed in this third edition, EPACASR–3, are not limited to chemical regulatory activities. Developed with the assistance of a number of Agency programs, the report includes such entries as technical assistance information, preregulatory assessments, chemical and biological testing, and monitoring programs, both completed and in progress. Because this document describes work in progress, listed activities are in various stages of completion, and have not necessarily completed any Agency peer review. The principal purpose of this information is to alert EPA users to other completed or ongoing work in order to avoid duplication of effort.

This publication supersedes EPACASR-Second Edition. EPACASR–3 is current to May 1982. Also, the data in EPACASR–3 now exists in an interactive data base, and can be accessed for either specific chemicals or specific types of activities. The broad base of the EPACASR–3 publication, together with this interactive computer capability, make it a useful tool for assessing the EPA-wide status of chemicals. Given a list of chemicals, EPACASR–3 can be used to quickly determine which EPA programs regulate a chemical, are considering regulating the chemical and/or are assessing the chemical, and what scientific/technical work has been done with regard to the chemical.

One difference between this edition and EPACASR-Second Edition is that Office of Research and Development (ORD) projects indicated as "in progress" in the latter are not included nor are newly begun projects. Projects that were completed have been carried over. This omission has been occasioned by the shutdown and remodeling of ORD's data system that had been used to identify chemical-related projects. ORD has advised us that a majority of the needed information will be available by the end of 1982. When these data have been collected, the information will then be added to the computer file and included in subsequent EPACASR editions.

We hope you find EPACASR–3 valuable. We will endeavor to handle your requests for use of the EPACASR–3 data base; please direct them to the Chemical Information and Analysis Program (202) 382-2249 together with any additions or corrections.

Walter W. Kovalick, Jr.
Director
Integration Staff
Office of Toxics Integration

Introduction

The following compilation of EPA's chemical-related activities is as complete as we can make it; however, there may be omissions or inaccuracies. In an effort to maintain a current data base, and to perfect future editions, we would appreciate having comments and any corrections or additions you may have.

The following pages contain suggestions for users. In brief, this report is organized into three sections.

1. Alphabetized Chemical Name Reference Listing (an index of names used for chemicals included in the text).

2. Chemical Name Synonym List (showing all synonyms for chemicals in the text, and arranged by CAS Registry Number).

3. EPA Chemical Activities Report (arranged sequentially by CAS Registry Number).

Sections 1 and 2 are in Volume I, Section 3 is in Volume II.

Comments, updates, and suggestions should be addressed to:

E. T. Merrick
Toxics Integration Staff
Office of Toxics Integration (TS–777)
U.S. Environmental Protection Agency
Washington, D.C. 20460
Phone: (202) 382-3415

Suggestions for Users

The decision to organize EPA Chemical Activities by CAS Registry Number (CAS number) is in accordance with a policy adopted by EPA that CAS Numbers and CAS Preferred Names be used to standardize chemical nomenclature.

We recognize that many people who will be using this report are not accustomed to using CAS numbers. For this reason, we are placing the index (Part I, Alphabetized Chemical Name Reference Listing) at the beginning.*

Because people interested in chemicals often want to know what other names are applied to a chemical of interest, we have included a listing of synonyms (Part II, Chemical Name Synonym List).

Chemical categories, and chemicals not registered by Chemical Abstracts Service, are assigned a Sequence number (SEQ number) arbitrarily. Synonyms or related names are indexed in the Alphabetized Chemical Name Reference Listing, and are given sequentially at the beginning of the Chemical Name Synonym List. The Sequence numbers are the first listings in the EPA Chemical Activity Status Report.

After obtaining the CAS or SEQ number for the chemical of interest, the user should then turn to Part III (EPA Chemical Activity Report) to ascertain what EPA activity relates to that chemical. In a number of instances, there will be only one entry; in others, as many as eight.

Part I and II comprise Volume 1; part III is Volume 2.

The text should be largely self explanatory. The items in each chemical report indicate: Authority, Activity, Status, Reason, and Contact. A few items will require some clarifications.

First, statutory authorities and sponsoring organizations are abbreviated. The following listings give those abbreviations:

Statutes:	AEA	Atomic Energy Act
	CAA	Clean Air Act
	CERCLA	Comprehensive Environmental Response, Compensation, and Liability Act
	CWA	Clean Water Act (Federal Water Pollution Control Act)
	ERDA	Energy Research and Development Act
	FIFRA	Federal Insecticide, Fungicide, and Rodenticide Act
	RCRA	Resource Conservation and Recovery Act
	SDWA	Safe Drinking Water Act
	TSCA	Toxic Substances Control Act

Three abbreviations appearing in the index may not be familiar to some users. These are:

VAN	Valid Ambiguous Name
8CI	Eighth Collective Index Preferred Name
9CI	Ninth Collective Index Preferred Name

---

*The sequence of chemical names that appear in the Alphabetized Chemical Name Reference Listing was produced by computer program. The program ignores all single characters for alphabetizing purposes. Numbers and letters (Roman and Greek) are not considered when they stand alone; i.e., if they are separated from the main body of the chemical name by a comma, dash or space. A few simple examples will illustrate this: t-butyl alcohol is alphabetized under b, while tert-butyl alcohol would be alphabetized under t; 4-dichlorobenzene and p-dichlorobenzene are alphabetized under d, while para-dichlorobenzene would be alphabetized under p; alpha-lindane would be alphabetized under a.

Contacts:	**Assistant Administrator's Office** (given as heading, although not used in text)	"OD"	Will usually be Office Directors; in Research and Development, will be the Assistant Administrator, except in the Office of Health and Environmental Assessment (OHEA).
		"DIV"	Will usually be a Division; in Research and Development, will be a location indicator except for the groups within OHEA, which will be so identified.

Note: Because EPA telephone numbers are undergoing change frequently, we have not attempted to list them for the contacts. EPA users should consult the most recent telephone directories. Others may contact the Agency's locator.

Headquarters (most listed contacts): (202) 382-2090
Research Triangle Park (OAQPS listings): (919) 541-2111 (Or 629-2111, FTS)

Notes on Entries:

Under "Activity," "regulation" can appear as "in development," "proposed" or "promulgated" in the "Status" category.

Under "Activity," "preregulatory" or other assessment refers to a study that will produce some or all of the data to support a regulation or a regulatory decision. Such an assessment will not always result in a regulation. These will have "Status" entries of "in development" or "completed".

The "Activity" designated as "technical assistance data" includes the Oil and Hazardous Materials Technical Assistance Data System and other files giving chemical characterization and hazard data, as well as guidance for handling chemical accidents and problem chemicals. All of these entries have "completed" "Status".

The "Activity" identified as RPAR/or ANPR will also appear as having "completed" "Status". This means that an RPAR or advance notice of proposed rulemaking was issued, and, usually, not that a final regulatory decision has been made.

The additional "Activity" items are self-explanatory. "Risk assessment" may be somewhat arbitrary, as the outcome of such an effort may not be a full-scale assessment of risk, but only a documentation of one aspect of risk or hazard.

"Status" entries are largely explained above. A few activites are described as being "in litigation" (when an action is being challenged in court), and "deferred" (in this case, giving a date and reason).

"Reasons" include "Carcinogenicity" (includes known as well as suspect carcinogens), "health effects other than carcinogenicity" (including knowledge or suspicion of mutagenicity, teratogenicity, and/or chronic effects), "environmental effects," "high volume production" (as determined by the organization responsible for the activity) and "Congressional mandate" (especially when a statute includes a specific mandate to address a chemical). The "Reason" entries: "member of class of concern," "surrogate for class," "metabolite of, " "similarity to" and "contamination with" will identify the CAS # of the appropriate chemical or the SEQ # of an unregistered class that appears in the publication. If the class or chemical is not a part of this report, it will be identified by a name.

"Contact" usually refers to a specific individual, especially if the "Activity" is "in progress."

Some "completed" activities will cite "report" as the contact, especially when the project manager is no longer with the Agency. The report number will be given under the "Status" entry, and usually can be obtained by request from the sponsoring office.

Sources of Data Included in the Text:

Clean Air Act

Criteria Pollutants designed under Sec. 109 of the Act (40 CFR 50).

Chemicals addressed under New Source Performance Standards (Sec. 111) (40 CFR 60).

National Emission Standards for Hazardous Air Pollutants (Sec. 112) (40 CFR 61).

Assessments in Progress, obtained from the Office of the Director, Air Quality Planning and Standards.

Clean Water Act

Hazardous Spill Regulations. Promulgated or proposed under Sec. 311 of the Act, and obtained from the F.R. Notices. (These will ultimately be superseded by regulations under CERCLA.)

Toxic Pollutant Effluent Standards proposed and promulgated under Sec. 307(a) of the Act, and obtained from 40 CFR 129, and the Criteria and Standards Division.

Water Quality Criteria published under Sec. 304 of the Act. Obtained the F.R. Notice of November 28, 1980.

NOTE: Effluent Guidelines, published under Section 306(b), were not included because they are generally not chemical specific; however, controlling certain traditional parameters will afford an unspecified degree of reduction in certain toxic chemicals.

Federal Insecticide, Fungicide, and Rodenticide Act

Major cancellations and suspensions, obtained from a compilation prepared by the Pesticide Enforcement Branch. This includes partial as well as total cancellation (e.g., the most hazardous uses may be cancelled, and other uses permitted with or without restrictions).

RPAR's issued under the reregistration authorities of Sec. 6. Rebuttable Presumption Against Registration (RPAR) is the normal first step toward cancelling or modifying pesticide registrations, although RPAR may not result in such action. Some final actions may be cited as RPAR.

Preregulatory assessments address those substances being considered for RPAR.

Restricted use pesticides are those that must be applied only by certified applicators.

Pesticides for which Registration Standards have been published or are being prepared have been obtained from OPP, as have the chemicals subject to data call-in. Data call-ins are designed to fill major data gaps. The Registration Standards are identified as "Reg Std - (common pesticide name)"; data call-ins are identified as "DCI - (common pesticide name)".

NOTE: Pesticide common names are incorporated into most entries, to make them more readily understandable to users.

Resource Conservation and Recovery Act

Chemicals designated as hazardous under Sec. 3001, obtained from the F.R. Notice of May 19, 1980 and subsequent amending notices.

Safe Drinking Water Act

Interim Primary Drinking Water Regulations promulgated under 40 CFR 141.

Interim Secondary Drinking Water Regulations, obtained from the F.R. Notice of March 31, 1977.

Chemicals for which ODW has published suggested-no-adverse-effect levels (SNARLS) or is developing same, and those for which primary regulations are in development.

Toxic Substances Control Act

Testing recommendations by the Inter-Agency Testing committee (ITC), under Sec. 4(e) authority. (F.R. Notices)

Preregulatory Assessments: Chemical Hazard Identification Profiles (CHIPs) and other assessments as obtained from the Office of Toxic Substances (CHIP's are summary reviews of readily available literature which present information on characterization, uses and effects of chemicals. Other assessments involve data gathering and/or conducting detailed studies of secondary information sources).

Chemicals regulated under Sec. 6, and proposed for, or subject to reporting rules under Sec. 8(a). Also, chemicals proposed for gathering of information about health and safety studies under the authority of Sec. 8(d). The contacts listed with the various Sec. 8 rules are the intended users of the submitted data.

Comprehensive Environmental Response, Compensation, and Liability Act.

OHM–TADS (Oil and Hazardous Materials Technical Assistance Data System), obtained from the Emergency Response Division, and maintained under joint authority of Section 311 of the Clean Water Act and CERCLA. Used to support Environmental Emergency Response programs.

Chemicals for which regulations under Sec. 101(14), are under development, obtained from the Emergency Response Division's listing of chemicals from mandated sources.

Other

OHEA reviews to support assessment under the foregoing statutes. Listing supplied by OHEA.

Completed ORD projects were retained from EPACASR–2.

Ongoing ORD activities cannot be retrieved or this time, and are not included. They will be identified and entered into the EPACASR system as circumstances permit.

Final ORD reports may still be available. Inquiries should be directed to the Publications Staff at (513) 684-7562. If they cannot provide copies, they will provide information on purchase source and price.

EPA CHEMICAL ACTIVITY REPORT

CAS NO: 3775-90-4
NAME: **2-Propenoic acid, 2-methyl-, 2-[(1,1-dimethylethyl)amino]ethyl ester**
AUTHORITY: TSCA/8A
ACTIVITY: REGULATION
STATUS: PROMULGATED; 6/22/82 40CFR712
REASON: OTHER; ITC RECOMMENDATION
REPORTING REQUIREMENT
LACK OF DATA
EXPOSURE POTENTIAL
CONTACT: TS/A/STEVE NEWBURG-RINN

CAS NO: 3813-14-7
NAME: **Acetic acid, (2,4,5-trichlorophenoxy)-, compd. with 2,2',2''-nitrilotris(ethanol) (1:1) (9CI)**
AUTHORITY: CWA/311
ACTIVITY: REGULATION
STATUS: PROMULGATED; 02/29/79; 40CFR117
REASON: GENERAL ENVIRONMENTAL EFFECTS
SPILL REPORTS OR USE AS SPILL DISPERSANT
CONTACT: WRS/CS/JOSEPH LEWIS

CAS NO: 3844-45-9
NAME: **Benzenemethanaminium, N-ethyl-N-[4-[[4-[ethyl[(3-sulfophenyl)methyl]amino]phenyl](2-sulfophenyl)methylene]-2,5-cyclohexadien-1-ylidene]-3-sulfo-, hydroxide, inner salt, disodium**
AUTHORITY: TSCA
ACTIVITY: SUMMARY REVIEW
STATUS: COMPLETED/PUBLISHED; 12/82; CHIP
REFERRED TO; FDA 03/82
REASON: KNOWN OR SUSPECT CARCINOGEN
CONTACT: TS/A/HANK APPLETON

CAS NO: 3882-06-2
NAME: **Cyclohexanamine, N-cyclohexyl-, nitrate**
AUTHORITY: TSCA
ACTIVITY: SUMMARY REVIEW
STATUS: COMPLETED/PUBLISHED; 10/77, CHIP
REASON: GENERAL HEALTH EFFECTS
MEMBER OF CLASS OF CONCERN; CYCLOHEXYLAMINE & DERIVATIVES
CONTACT: TS/A/HANK APPLETON

CAS NO: 3942-54-9
NAME: **Carbamic acid, methyl-, 2-chlorophenyl ester**
AUTHORITY: FIFRA
ACTIVITY: TECHNICAL ASSISTANCE DATA
STATUS: COMPLETED/PUBLISHED; 06/25; EPA 670/2-75-057
REASON: GENERAL HEALTH EFFECTS
GENERAL ENVIRONMENTAL EFFECTS
OTHER; DISPOSAL, SMALL AMOUNT
CONTACT: RD/EDSN/REPORT

CHRONIC TOXICITY
CONTACT: TS/ITC/MARTIN GREIF

CAS NO: 51338-27-3
NAME: Propanoic acid, 2-[4-(2,4-dichlorophenoxy)phenoxy], methyl ester (9CI)
AUTHORITY: FIFRA/3
ACTIVITY: OTHER; DCI-DICHLOFOP-METHYL
STATUS: PROPOSED; 02/82
REASON: LACK OF DATA
CHRONIC TOXICITY
CONTACT: PP/SPR/GERALDINE WERDIG

CAS NO: 51363-64-5
NAME: Phosphoric acid, diisodecyl phenyl ester
AUTHORITY: TSCA/8A
ACTIVITY: REGULATION
STATUS: PROMULGATED; 6/22/82 40CFR712
REASON: OTHER; ITC RECOMMENDATION
REPORTING REQUIREMENT
LACK OF DATA
EXPOSURE POTENTIAL
CONTACT: TS/A/STEVE NEWBURG-RINN

CAS NO: 51580-86-0
NAME: 1,3,5-Triazine-2,4,6(1H,3H,5H)-trione, 1,3-dichloro-, sodium salt, dihydrate (9CI)
AUTHORITY: FIFRA/3
ACTIVITY: OTHER; DCI-ISOCYAN. DICHLORIDE
STATUS: COMPLETED/PUBLISHED; 12/81
REASON: OTHER; DATA BEING GENERATED
LACK OF DATA
MEMBER OF CLASS OF CONCERN; ISOCYANURATES
CHRONIC TOXICITY
CONTACT: PP/SPR/HOMER HALL
AUTHORITY: FIFRA/6
ACTIVITY: REGULATION
STATUS: IN DEVELOPMENT/PROGRESS; 03/82
REASON: OTHER; RENAL TOXICITY
SOME USES OR PRODUCTS
VOLUNTARY
CANCELLATION OF REGISTRATION OR BAN
CONTACT: PP/SPR/JAN AUERBACH

EPA CHEMICAL ACTIVITY REPORT

CAS NO: 51630-58-1
NAME: Benzeneacetic acid, 4-chloro-.alpha.-(1-methylethyl)-, cyano(3-phenoxyphenyl)methyl ester (9CI)
AUTHORITY: FIFRA/3
ACTIVITY: OTHER; REPORTING REQUIREMENT
STATUS: COMPLETED/PUBLISHED; 09/09/81
REASON: OTHER; SINGLE SPECIES
